

## Volume 25: Optical Methods of Investigating Solid Bodies

Filesize: 2.31 MB

### ***Reviews***

*An exceptional pdf as well as the font employed was intriguing to read through. This is certainly for all who statte there was not a worthy of reading through. I am just delighted to inform you that here is the very best publication i actually have go through inside my very own existence and might be he finest pdf for actually.*

## VOLUME 25: OPTICAL METHODS OF INVESTIGATING SOLID BODIES

DOWNLOAD

To read **Volume 25: Optical Methods of Investigating Solid Bodies** PDF, please access the link below and download the ebook or gain access to additional information which might be in conjunction with VOLUME 25: OPTICAL METHODS OF INVESTIGATING SOLID BODIES book.

Book Condition: New. Publisher/Verlag: Springer, Berlin | The principal results of the work are as follows: 1. A simplified technique was devised for obtaining Raman spectra of powders. 2. The Raman and infrared absorption spectra of the following oxides were investigated: AsP<sub>3</sub> and SbP<sub>3</sub>; As<sub>2</sub>O<sub>3</sub> SbP<sub>5</sub>. TeO<sub>2</sub>. GeO<sub>2</sub> (two forms) in the crystalline state, and AsP<sub>3</sub> and GeO<sub>2</sub> and TeO in the glassy state. 2.5.2.3. The vibrational spectra of the crystalline and glassy forms of the oxides AsP<sub>3</sub> and GeO<sub>2</sub> and TeO are similar in many main respects, indicating a similarity of their structural units which determine the vibrational spectra of these substances. 4. By a study of the vibrational spectrum it was shown that arsenious anhydride has a molecular structure and consists of AsO<sub>3</sub> molecules having symmetry of the point group Td; The force constants and vibration frequencies of the AsO<sub>3</sub> molecule were calculated, and the vibrational spectrum of arsenious anhydride was reliably interpreted with the aid of these results. 5. A similar result was obtained for antimonous anhydride, consisting of SbO<sub>3</sub> molecules with symmetry of the point group Td. The force constants for this molecule were found and the vibrational spectrum was calculated. | I. Polyatomic Molecules and Molecular Crystals (aims, methods, and objects of the investigation, statement of problems, review of literature).- II. Anisotropy of Molecules (determination of the orientation of radiating oscillators with respect to the axes of the molecules by means of the polarization spectra of the luminescence of solutions).- III. The Oriented Gas Model and its Application to Molecular Crystals (polarization diagrams of luminescence).- IV. Migration of Excitation Energy Between the Molecules in Molecular Crystals (dependence of the polarization of the luminescence on that of the exciting light).- V. The Part of Free Excitons in...
