Reviews

This pdf may be worth getting. It is actually written in straightforward words and not difficult to understand. You will not feel monotony at any moment of your respective time (that's what catalogs are for about should you request me).

In soil studies the factors and relations are complex, and it is often difficult, if not impossible, to evaluate carefully the antagonistic features. Leaving out of consideration the effects of liming on acidity, its relation to nitrogen fixation and to toxic organic constituents of the soil, and the like, there remains the fact that the addition of lime compounds, both alone and in conjunction with other fertilizers, has resulted in marked increases in yield. The injurious action resulting when unbalanced conditions prevail, and the importance of calcium in correcting this action, make it probable that in many cases the beneficial effects obtained from calcium compounds are due to antagonistic relations. In any event the general trend of results indicates that where any single fertilizer has proved injurious it would be well to apply a calcium compound, at least...
