Forgotten Books, United States, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Brown Alumni Monthly, Vol. 41: October, 1940 D dr. M. L. Crossley 09, who last winter received the New York Brown Club s first Brown Bear award, told the American Chemical Society at its recent meeting that he and his associates in the American Cyanamid Company had discovered that the protein of the blood serum underwent chemical change in animals suffering from pneumonia. The experiments were particularly significant because of the hope Of discovering a new chemical method of treating pneumonia and other infectious diseases in human beings. Said Dr. Crossley: How infecting agents cause disease, what changes occur, where these changes are initiated, the nature of the resulting products and their effect on the animal, are questions which must be answered before chemotherapy can be highly effective in relieving man Of the many ills that now reduce his efficiency, limit his usefulness, and endanger his life. It is imperative to know the nature of the chemical reactions involved in infectious diseases, this knowledge is essential to the future development of chemotherapy.
