D.K. Printworld (P) Ltd., New Delhi, India, 2008. Softcover. Book Condition: New. The book attempts to examine those occult sciences that deal with the birth- and name-related attributes of human beings, their bodily features and their style of writing for deeper insights into personality and fate -- topics like astrology, numerology, palmistry, physiognomy, phrenology, moleosophy and graphology. In a simple language and with easy-to-understand examples and illustrations, Dr Nandlal Vanvari reveals the way in which these sciences explain aspects of human character and mind by going beyond the environmental conditioning of man and his trait of reducing everything to automatic reflex. Keeping the modern scientific perspective in mind throughout, he delves into horoscopes and effects of the planets and constellations, the significance of numbers in numerology and their association with planets, the palm lines, significance of moles located in different parts of the body and so on. The work will be useful for those associated with the sciences of the mind as well as general readers interested in occult sciences. Printed Pages: 336. Size: 15 x 23 Cm.
